

European Metropolitan Housing Markets: Advances in Spatial Science

Cities are the engines of economic growth and innovation, but they also face significant challenges, including the provision of affordable and sustainable housing. In Europe, metropolitan housing markets are particularly complex and dynamic, due to factors such as historical development, economic restructuring, and migration.

European Metropolitan Housing Markets: Advances in Spatial Science provides a comprehensive overview of the latest research on metropolitan housing markets in Europe. The book is divided into three parts:

European Metropolitan Housing Markets (Advances in Spatial Science)
