

Foundations for Community Health Workers: Empowering Agents in Public Health

In the face of persistent health disparities and the growing complexity of public health challenges, community health workers (CHWs) have emerged as essential members of the health care team. CHWs are frontline workers who bridge the gap between communities and the health care system, providing culturally competent and linguistically appropriate services that address the unique needs of the populations they serve.

Foundations for Community Health Workers is a comprehensive guide to developing and implementing effective CHW programs. This book provides a detailed overview of the CHW profession, including the core competencies, roles, and responsibilities of CHWs. It also explores the evidence base for CHW interventions and provides practical guidance on program design, implementation, and evaluation.

The book is written by a team of experts in the field of CHW, including researchers, practitioners, and policymakers. It draws on the latest research and best practices to provide a comprehensive and up-to-date resource for anyone interested in CHW programs.
